

Our range of Light Guide Panels Engraving Machine is widely used in making LGP. Many cutting sizes are available at request.

Different size has different optical efficiency, Optical efficiency for 600 x 600 panel light system 72 to 73%.

Perfect light guide effects, with even light, automatically adjust the cutting depth of light guide panel plate

# LGP

## PMMA LIGHT GUIDE PANEL FOR LED PANEL LIGHT

### Key Specifications/Special Features:

1. Panel size available:  
300x300mm, 300x600mm, 300x1200mm, 600x600mm, 600x1200mm, 620x620mm
2. Lighting from the side edge, with even lighting, soft and non-glare surface.  
It adopts super bright SMD as its illuminate, energy saving more than 80%.
3. Using efficient constant current isolation driver, high PF, Wide input voltage.
4. Start fast, no noise.
5. Using the professional circuit design, each set of lights to work independently,  
Avoids single led failure affecting one group.
6. Anti-EMI, mercury-free, Lead-free, green environmental protection, compliance with CE, RoHS, TUV, GS requirements.
7. Normally use period of 5 years.
